# INDEX TO VOLUME XXXIV

Akin, Ethan *Exponential families and game dynamics*, 374–405
Alexander, H. *A note on projective capacity*, 1319–1329
Alspach, Brian and Parsons, T. D. *A construction for vertex-transitive graphs*, 307–318
Anderson, D. D. and Anderson, David F. *Divisibility properties of graded domains*, 196–215
Anderson, David F. and Anderson, D. D. *Divisibility properties of graded domains*, 196–215
Anstee, R. P. *Properties of a class of* (0, 1)*-matrices covering a given matrix*, 438–453
Argyros, S. and Kalamidas, N. *Property* $k_{\omega\omega}$ *on spaces with strictly positive measures*, 1047–1058
Axler, Sheldon, Conway, John B., and McDonald, Gerard *Toeplitz operators on Bergman spaces*, 466–483
Aziz, Abdul *Inequalities for polynomials with a prescribed zero*, 737–746

Baggett, Larry and Taylor, Keith F. *On asymptotic behavior of induced representations*, 220–232
Ball, Richard N. *The generalized orthocompletion and strongly projectable hull of a lattice ordered group*, 621–661
Bankston, Paul *Some obstacles to duality in topological algebra*, 80–90
Batola, Francois *Une généralisation d'une formule de Meixner-Tricomi*, 411–422
Beardon, A. F. and Nicholls, P. J. *Ford and Dirichlet regions for Fuchsian groups*, 806–815
Benkart, Georgia M., Britten, Daniel J., and Osborn, J. Marshall *Real flexible division algebras*, 550–588
Berberian, S. K. *Factor-correspondences in regular rings*, 23–30
Birman, Joan S. *Errata: On the conjugacy problem in the braid group*, 1396–1397
Britten, Daniel J., Benkart, Georgia M., and Osborn, J. Marshall *Real flexible division algebras*, 550–588
Bruns, Gunter and Greechie, Richard *Orthomodular lattices which can be covered by finitely many blocks*, 696–699
Bruns, Gunter and Greechie, Richard *Some finiteness conditions for ortho-modular lattices*, 535–549
Burris, Stanley and Lawrence, John *Two undecidability results using modified Boolean powers*, 500–505
Bustoz, Joaquin and Ismail, Mourad E. H. *The associated ultraspherical polynomials and their q-analogues*, 718–736

Carlson, Stephan C. *Rich proximities and compactifications*, 319–348
Carson, Andrew B. and Marshall, Murray A. *Decomposition of Witt rings*, 1276–1302
Chang, Bomshik *Elements of order Coxeter number +1 in Chevalley groups*, 945–951
Childs, L. N. *A Stickelberger condition on cyclic Galois extensions*, 686–690
Coelho, Sonia P. *Group rings with units of bounded exponent over the center*, 1349–1364
Conway, John B., Axler, Sheldon, and McDonald, Gerard *Toeplitz operators on Bergman spaces*, 466–483
Cross, G. E. *Additivity of the* $P^{\omega}$*-integral (2)*, 506–512
Currie, James D., and Williams, Kenneth S. *Class numbers and biquadratic reciprocity*, 969–988

83 I 188AA5 2 013 I XL 2157

Dauge, Monique *Operateur de Stokes dans des espaces de Sobolev a poids sur des domaines anguleux*, 853–882
Deeb, Waked *Necessary and sufficient conditions for the equality of L(f) and P*, 406–410
Dow, Alan *Some separable spaces and remote points*, 1379–1389
Dubuc, Serge et Savoie, Jean *Résolution d'équations associées à un système de Tchebycheff*, 593–620

Evans, Ronald, Ismail, Mourad, E. H., and Stanton, Dennis *Coefficients in expansions of certain rational functions*, 1011–1024

Fegan, H. D. *Special function potentials for the Laplacian*, 1183–1194
Fiedorowicz, Z. and May, J. P. *Homology operations revisited*, 700–717
Filaseta, Michael *A further generalization of an irreducibility theorem of A. Cohn*, 1390–1395
Fournier, Gilles and Fournier, Reine *On the homotopy property of Nussbaum's fixed point index*, 44–62
Fournier, Reine and Fournier, Gilles *On the homotopy property of Nussbaum's fixed point index*, 44–62
Frappier, C. and Rahman, Q. I. *On an inequality of S. Bernstein*, 932–944

Gauthier, P. M., Hengartner, W. et Labrèche, M. *Approximation harmonique, approximation holomorphe et topologie*, 216–219
Gilbert, William J. *Complex numbers with three radix expansions*, 1335–1348
Goodaire, Edgar G. and Robinson, D. A. *A class of loops which are isomorphic to all loop isotopes*, 662–672
Goulden, I. P. and Jackson, D. M. *The application of Lagrangian methods to the enumeration of labelled trees with respect to edge partition*, 513–518
Greechie, Richard and Bruns, Gunter *Orthomodular lattices which can be covered by finitely many blocks*, 696–699
Greechie, Richard and Bruns, Gunter *Some finiteness conditions for orthomodular lattices*, 535–549

Halperin, Stephen and Thomas, Jean Claude *Rational equivalence of fibrations with fibre G/K*, 31–43
Heath-Brown, D. R. *Prime numbers in short intervals and a generalized Vaughan identity*, 1365–1376
Hengartner, W., Gauthier, P. M. and Labrèche, M. *Approximation harmonique, approximation holomorphe et topologie*, 216–219
Heitmann, Raymond C. and McAdam, Stephen *Distinguished domains*, 181–193
Herstein, I. N. *A theorem on derivations of prime rings with involution*, 356–369
Hill, David A. *Rings whose indecomposable injective modules are uniserial*, 797–805
Hilton, A. J. W. and Rodger, C. A. *Latin squares with prescribed diagonals*, 1220–1223
Hoo, C. S. *Pseudocomplemented and implicative semilattices*, 423–437

Ismail, Mourad E. H., Evans, Ronald, and Stanton, Dennis *Coefficients in expansions of certain rational functions*, 1011–1024
Ismail, Mourad E. H. and Bustoz, Joaquin *The associated ultraspherical polynomials and their q-analogues*, 718–736

Jackson, D. M. and Goulden, I. P. *The application of Lagrangian methods to the enumeration of labelled trees with respect to edge partition*, 513–518
John, David *Simple links in locally compact connected Hausdorff spaces are nondegenerate*, 349–355
Johnston, Elgin H. *Rearrangements that preserve rates of divergence*, 916–920
Johnson, Jon L. *Three topological properties from Noetherian rings*, 525–534
Jungnickel, Dieter *On automorphism groups of divisible designs*, 257–297

Kalamidas, N. and Argyros, S. *Property $k_{n,n}$ on spaces with strictly positive measures*, 1047–1058
Kantor, William M. *Ovoids and translation planes*, 1195–1207
Katavolos, A. *Non commutative $L_p$ spaces II*, 1208–1214
Katchalski, M. and Liu, A. *Intersection patterns of families of convex sets*, 921–931
Kent, D. C. and Richardson, G. D. *A compactification with $\theta$-continuous lifting property*, 1330–1334
Kieffer, John C. and Rahe, Maurice *The pointwise ergodic theorem for transformations whose orbits contain or are contained in the orbits of a measure-preserving transformation*, 1303–1318
Kirdar, M. S. and Skyrme, T. H. R. *On an identity relating to partitions and repetitions of parts*, 194–195
Kochman, Stanley O. *Primitive generators for algebras*, 454–465
Kolaski, Clinton J. *Isometries of weighted Bergman spaces*, 910–915
Krempa, Jan *Isomorphic group rings of free abelian groups*, 8–16
Kumagai, Donna *The measure spectrum of a uniform algebra and subharmonicity*, 673–685

Labrèche, M., Gauthier, P. M. et Hengartner, W. *Approximation harmonique, approximation holomorphe et topologie*, 216–219
Lawrence, John and Burris, Stanley *Two undecidability results using modified Boolean powers*, 500–505
Lee, Heisook and Orzech, Morris *Brauer groups, class groups and maximal orders for a Krull scheme*, 996–1010
Levesque, Claude *Systèmes fondamentaux d'unités de certains corps de degré 4 et de degré 8 sur Q*, 1059–1090
Levy, Lawrence S. and Smith, Patrick F. *Semi-prime rings whose homomorphic images are serial*, 691–695
Liu, A. and Katchalski, M. *Intersection patterns of families of convex sets*, 921–931
Lorentz, G. G. *The analytic character of the Birkhoff interpolation polynomials*, 765–768
Lubin, A. R. *Spectral inclusion and C.N.E.*, 883–887

McAdam, Stephen and Heitmann, Raymond C. *Distinguished domains*, 181–193
McCool, James *On reducible braids: Erratum*, 1398
McDonald, Gerard, Axler, Sheldon, and Conway, John B. *Toeplitz operators on Bergman spaces*, 466–483
Malzan, J. *Products of positive reflections in the orthogonal group*, 484–499
Marshall, Murray A. and Carson, Andrew B. *Decomposition of Witt rings*, 1276–1302
Matlis, Eben *Commutative coherent rings*, 1215–1219
May, J. P. and Fiedorowicz, Z. *Homology operations revisited*, 700–717
Meril, A. *Symbole holomorphe*, 989–995
Misso, Paola *Commutativity conditions on rings with involution*, 17–23
Moody, R. V. and Yokonuma, T. *Root systems and Cartan matrices*, 63–79
Morris, L. E. *Eisenstein series for reductive groups over global function fields, I*, 91–168
Morris, L. E. *Eisenstein series for reductive groups over global function fields II*, 1112–1182

Newman, D. J. and Rivlin, T. J. *On polynomials with curved majorants*, 961–968
Nicholls, P. J. and Beardon, A. F. *Ford and Dirichlet regions for Fuchsian groups*, 806–815

Ohta, Haruto *Topological extension properties and projective covers*, 1255–1275
Orzech, Morris and Lee, Heisook *Brauer groups, class groups and maximal orders for a Krull scheme*, 996–1010
Osborn, J. Marshall, Benkart, Georgia M., and Britten, Daniel J. *Real flexible division algebras*, 550–588

Parsons, T. D. and Alspach, Brian *A construction for vertex-transitive graphs*, 307–318
Pastijn, Francis *L'enveloppe conjuguee d'un demi-groupe inverse a metacentre idempotent*, 909–909
Pathak, V. D. *Linear isometries of spaces of absolutely continuous functions*, 298–306
Pedersen, Gert Kjaergard and Størmer, Erling *Traces on Jordan algebras*, 370–373
Pierre, R. and Rahman, Q. I. *On a problem of Turán about polynomials III*, 888–899
Poljak, Svatopluk and Turzik, Daniel *A polynomial algorithm for constructing a large bipartite subgraph, with an application to a satisfiability problem*, 519–524

Rahe, Maurice and Kieffer, John C. *The pointwise ergodic theorem for transformations whose orbits contain or are contained in the orbits of a measure-preserving transformation*, 1303–1318
Rahman, Q. I. and Pierre, R. *On a problem of Turán about polynomials III*, 888–899
Rahman, Q. I. and Frappier, C. *On an inequality of S. Bernstein*, 932–944
Ramras, Mark *Bounds on Betti numbers*, 589–592
Richardson, G. D. and Kent, D. C. *A compactification with θ-continuous lifting property*, 1330–1334
Rigby, J. F. *Half-turns and infinite chains of Clifford configurations*, 816–831
Ritter, Jürgen and Sehgal, Sudarshan *Integral group rings of some p-groups*, 233–246
Rivlin, T. J. and Newman, D. J. *On polynomials with curved majorants*, 961–968
Roberts, Leslie G. *Ordinary singularities with decreasing Hilbert function*, 169–180
Robinson, D. A. and Goodaire, Edgar G. *A class of loops which are isomorphic to all loop isotopes*, 662–672
Rodger, C. A. and Hilton, A. J. W. *Latin squares with prescribed diagonals*, 1220–1223
Rosencor, Shlomo *Completely reducible operator algebras and spectral synthesis*, 1025–1035

Santharoubane, L. J. *Kac-Moody Lie algebras and the classification of nilpotent Lie algebras of maximal rank*, 1215–1244
Savoie, Jean et Dubuc, Serge *Résolution d'équations associées à un système de Tchebycheff*, 593–620
Sawyer, Eric *Holomorphic functions with positive real part*, 1–7
Schmerl, James H. *The effective version of Brooks' theorem*, 1036–1046
Sehgal, Sudarshan and Ritter, Jurgen *Integral group rings of some p-groups*, 233–246
Shastri, Anant R. *Degree one maps and a realisation theorem*, 769–796
Skyrme, T. H. R. and Kirdar, M. S. *On an identity relating to partitions and repetitions of parts*, 194–195
Smith, Patrick F. and Levy, Lawrence S. *Semi-prime rings whose homomorphic images are serial*, 691–695
Stanton, Dennis, Evans, Ronald and Ismail, Mourad E. H. *Coefficients in expansions of certain rational functions*, 1011–1024
Størmer, Erling and Pedersen, Gert Kjaergard *Traces on Jordan algebras*, 370–373

Taylor, Keith F. and Baggett, Larry *On asymptotic behavior of induced representations*, 220–232
Thomas, Jean Claude and Halperin, Stephen *Rational equivalence of fibrations with fibre $G/K$*, 31–43
Turzik, Daniel and Poljak, Svatopluk *A polynomial algorithm for constructing a large bipartite subgraph, with an application to a satisfiability problem*, 519–524
Tutte, W. T. *Chromatic solutions*, 741–758
Tutte, W. T. *Chromatic solutions, II*, 952–960

Van Daele, A. *Dense subalgebras of left Hilbert algebras*, 1245–1254

Watson, W. Stephen *Locally compact normal spaces in the constructible universe*, 1091–1096

Williams, Kenneth S. and Currie, James D. *Class numbers and biquadratic reciprocity*, 969–988
Wolf, Thomas R. *Solvable and nilpotent subgroups of $GL(n, q^m)$*, 1097–1111

Yokonuma, T. and Moody, R. V. *Root systems and Cartan matrices*, 63–79
Yoneda, Kaoru *Perfect sets of uniqueness on the groups $2^\omega$*, 759–764
Yucas, Joseph *Localizations of linked quaternionic mappings*, 247–256

Zaheer, Neyamat *On Lucas-sets for vector-valued abstract polynomials in h-inner product spaces*, 832–852
